Schedule

- Center is open Monday – Friday, 8:30am – 3:30pm
- Client schedules are individualized at intake to meet the needs of the child and family.

CLINIC FEATURES:

- Indoor Sensory Area
- Fun Factory Gym
- Individual treatment centers

What to Expect of Services?

Step 1.
Intake Process

The Intake Process includes a case manager gathering diagnostic evaluations and insurance information followed by completion of an intake.

Step 2.
Assessment

Individualized assessment tools will be used to identify areas of need and programming.

Step 3.
Treatment Planning

Treatment Planning includes the generation of the individualized treatment plan and the creation of any additional programming needed to initiate services.

Step 4.
Service Delivery

Once the treatment team has reviewed the assessment results and treatment plan, services are able to begin. This usually includes daily or regular services by a direct care staff and clinical oversight by a certified or licensed clinician.

Step 5:
Measuring Outcomes

Measuring Outcomes includes continued evaluation of data collection on an ongoing basis.

Early Intensive Behavior Intervention

Therapeutic Learning

ABA SUPPORT SERVICES, LLC
MAKING CONNECTIONS TODAY FOR A BETTER TOMORROW

Who is ABA Support Services (ABASS)?

ABASS specializes in providing evidence-based procedures derived from the science of Applied Behavior Analysis to children to improve their functional skills and adaptation to their environment so they can reach their full potential. We regard the child as our Client. Each child receives a teaching program that is comprehensive, individual, and intensive to ensure effectiveness and optimal progress based on their ability.

ABASS is dedicated to abide by the ethical standards outlined by the Behavior Analyst Certification Board. ABASS utilizes the principles of Applied Behavior Analysis and develops individualized programs or treatment plans that target cognitive, speech, language, academic or school readiness, behavior management, play, and social skills. Each individualized program is based on the child's strengths and deficits. The goal is to decrease maladaptive behaviors and replace them with functional skills that will allow autonomy.

What is Early Intensive Behavior Intervention?

Early Intensive Behavior Intervention (EIBI) is the evidence-based treatment of communication and developmental disorders beginning in early childhood using the principles of applied behavior analysis (ABA). The goals of EIBI are to develop important pivotal skills including but not limited to initiating communication, imitation, joint attention, expanding play skills and increasing independence.

What is special about the ABASS EIBI Clinic?

The ABASS EIBI clinic provides a therapeutic learning environment that promotes school-readiness and opportunities for peer interaction while scaffolding to accommodate each learner's individual needs.

WE DO THIS WITH:

- 1:1 staffing
- 1:1 parent training
- Evidence-based early-childhood curriculum
- On-site Speech and Occupational Therapy
- Collaboration with outside therapies (e.g. Speech, OT, Feeding, PT, etc.)
- Evidence-based therapeutic strategies (e.g. Early Start Denver Model, PEAK Relational Training)
- Ongoing staff supervision and coaching

Who Qualifies:

- Children under 5 years of age.
- Child has a qualifying diagnosis determined during intake process.

Integrity, Quality, and Excellence

WE ARE EXPERTS IN THE FIELD

We employ professional BCBAs, RBTs, and direct care staff in the process of being certified to be RBTs. Our staff are trained yearly on the most current research-based interventions. We provide in-house training with some of the leading experts in the field and we train our staff in multiple programs and collaborate with many different related providers. We don't focus on one exclusive program, but rather the focus is on the child and his or her response to learning.

OUR CLIENT IS OUR FOCUS

Each child is unique and requires a different approach. We pride ourselves on learning and meeting the needs of our clients. Our staff prides themselves on only utilizing research-based interventions that improve the child's quality of life and promotes access to natural reinforcement in their environment.

STRONG PARTNERS

We pride ourselves on building strong collaborative relationships with schools, related providers, parents, clients, advocacy groups and other professionals.

Our Staff

All staff receive extensive, individualized training that is tailored to their client's needs.

SUPERVISORS

All of our supervisors are either BCBAs or Licensed Behavior Specialists in training to become BCBAs.

BEHAVIOR TECHNICIANS

Our Behavioral Health Technicians are trained to be eligible to sit for the RBT exam through the BACB.
